vandermoon.com

Since 1993, Vitberg has been producing medical devices for rehabilitation, treatment, cosmetology and sports.

Its products are known and appreciated. Medicine and technology are not our only passion, we also love exploring the world.

We have translated the experience gained over the years into the production of accessories for people like us. This is how the Van Der Moon brand was born.

Made in Poland, EU.

General information

The construction of the Moon Box is made of high-quality aluminum and special, super-strong and ultra-light polypropylene chamber plates. The boards are resistant to temperatures, water, oils and chemicals. The connections are riveted and screwed and additionally reinforced with a layer of glue, thanks to which the structure becomes even more durable and resistant to any vibrations. The Moon Box construction is covered with an additional 0.5 cm foam coating, and the corners of the structure are reinforced to avoid any damage during possible mechanical operation. Depending on the size, the Moon Box has 2 shelves (Moon Box 50 and 70 cm) or 4 shelves (Moon Box 95 and 115 cm). The size of the shelves allows for easy storage of assortment of various sizes. In sizes 95 and 115, the space of the shelves is divided in half to strengthen the load capacity of the shelf and to divide the storage space. In the inner part of the Moon Box there are holders for mounting protective nets (Moon Safety) - these catches are made of aluminum sheet and painted with powder varnish. The Moon Box is trimmed with a durable technical fabric. The material is characterized by durability and high resistance to abrasion, tearing and mechanical actions, it is light and relatively stiff. It is made of polyester fibers that slightly absorb water, but thanks to the PVC-coated bottom layer, the fabric is waterproof. There are mounting holes on the structure, finished with plates specially designed for this purpose. The upper part of the cover is equipped with a handle for convenient carrying of the Moon Box.

Compatible car models:

Car brand	Model	Version	MOONBOX	ANGLE
Mercedes	Sprinter 901		●	110°

MOONBOX

Standard i Adventure

MoonBox are suspended cabinets for a campervan with a quick fastening system. The hard structure has been covered with shock-absorbing foam. The aluminum frame and specialized chamber plates guarantee great durability in a lightweight version. Internal shelves allow in keeping clothes and accessories in order, and the external system of pockets and clips will help to attach things that are always to be at hand. MoonBox in the largest version can hold up to 124 liters of necessary camping accessories.

Lightweight design

Waterproof material

Armored construction

Hard frame protected with foam

Easy **cleaning**

Top quality

MoonFix

That is a quick assembly system with comfortable butterflies.

Quick montage

Assembly and disassembly takes a few minutes. You can turn your van into a campervan whenever you feel the call of adventure!

Moon Box will **not get wet** and you can **clean** it easily.

Moon Box is trimmed with a durable technical fabric. The inner side of the fabric is laminated with a special coating, thanks to which the Moon Box is waterproof and vapour-proof. The dense and tight weave makes the fabric light and very durable at the same time.

Soft and cuddly.

Meet the softest of „hard“ furniture for your Van. We covered 98% of the surface of the MoonBox with a special cushioning sponge. Now Moon Box is soft, safe for your head and very elegant.

Top quality.

One Moon Box is 417 elements that fit together. We need three workers and 16 hours of manual work to make it. Before it is shipped to you, it undergoes rigorous quality tests. All components come from EU suppliers

Armored? Almost!

Moon Box is made of high-quality aluminum and special chamber plates. Everything is bonded with an adhesive of unprecedented strength. We cut out, bend and knead the structural element with an accuracy of 0.1 mm. It is much more than enough. But that's why the Moon Boxes are so solid.

MOONBOX
Super durable. Ultra light.

Information regarding use

Cleaning

Handwash. Rinse the soiled area thoroughly with clean water and wipe it with a sponge gently using a mild detergent. Do not use bleach, iron or heat drying. The product is not machine washable. Before cleaning, remove all elements from the inside of the Moon Box along with the shelf. Metal parts should be dry cleaned.

Composition

poliester 100%, coating PVC-FLAT, aluminium, polypropylene plate

Transport and storage

The products are packed in cardboard outer packaging.
During transport, they should be placed horizontally or vertically.
Must be transported in the original packaging.

Disposal of the packaging

The packaging is made of recyclable cardboard, so it should not be thrown away, but stored in a landfill in waste paper bins or special containers for cardboard packaging.

Precautions

Please make sure you have read and understood the instructions before using the Moon Box.

After installation, it is recommended to check the mounting of the Moon Box by pulling the entire structure firmly.

Do not leave the Moon Box in direct sunlight - it may cause fading of the material. This does not change the mechanical properties of the material.

Do not use open fire near the Moon Box.

Protect against moisture.

Do not load the Moon Box beyond the recommended maximum weight.

Do not use any sharp objects such as knives, screwdrivers, etc. to remove the outer packaging.
